Aditya Garg

Software Engineer (Full-Stack & AI) | B.Tech CSE, 2027
+91 97735 85792 | adityagarg023@gmail.com | LinkedIn | GitHub

Summary

Full-stack software engineer who builds and ships secure, AI-powered products: REST APIs in FastAPI and Next.js, authenticated PostgreSQL backends, and ML forecasting pipelines. Strong in Data Structures and Algorithms (LeetCode contest rating 1600+, top 16%) with three cloud-deployed projects and an AI/Data Science internship. Seeking SDE / Full-Stack roles, 2027 graduate.

Technical Skills

Languages: Python, TypeScript, JavaScript, C++, SQL
Frontend: React, Next.js(App Router), Tailwind CSS
Backend & API: FastAPI, Node.js, REST APIs, Zod, Clerk(auth)
Database: PostgreSQL, Supabase(migrations, RLS)
Testing & DevOps: Vitest, Testing Library, GitHub Actions(CI), Git, Linux, Vercel, Render
AI/ML: Scikit-Learn, Pandas, Numpy, Matplotlib, Time series forecasting, Google Gemini API
CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Projects

CodeShift - AI Code Translator | *React, Tailwind CSS, FastAPI, Google Gemini API* **Live Demo** · **GitHub**

- Built and deployed a full-stack app translating code across 8 languages, with a RESTful FastAPI backend and React frontend on cloud hosting (Vercel, Render).
- Integrated the Google Gemini API to generate translated code from user-provided source code based on dynamically constructed prompts.

ForgeFocus - Deepwork Tracker | *Next.js, TypeScript, Supabase, Clerk, Tailwind, Vitest* **Live Demo** · **GitHub**

- Built a full-stack focus-tracking app with a pause/resume countdown, overtime stopwatch, and timer recovery after page refresh, plus a GitHub-style consistency chart and profile stats.
- Built REST route handlers with Clerk authentication, per-user authorization on every query, and Zod validation; idempotent writes prevent duplicate sessions on retried requests.
- Modeled the PostgreSQL schema with versioned migrations and row-level security; added Vitest unit tests and a GitHub Actions CI workflow running on every push.

Sales Analyzer | *Python, Pandas, Numpy, Matplotlib, Scikit-Learn, StreamlitUI* **Live Demo** · **GitHub**

- Built an automated data pipeline (cleaning, transformation, aggregation) that cut manual reporting time significantly.
- Created interactive visual dashboards to provide actionable insights for sales and marketing teams.

Experience

AI and Data Science Intern June 2026 – July 2026
XYlofy AI *Bengaluru, Karnataka*

- Built an end-to-end sales forecasting pipeline in Python (Pandas, Scikit-Learn) on time-series data, covering preprocessing, feature engineering, and evaluation.
- Built an interactive dashboard with anomaly detection and demand segmentation, used by leadership.
- Converted model output into business briefs and visualizations for non-technical stakeholders (HR, leadership).

Coding Profile

Leetcode: 160+ problems solved | Contest rating 1600+ (top 16%) **Profile Link**

Education

Noida International University Greater Noida, UP
B. Tech. in CSE (CGPA - 8.1) *Aug. 2023 – May 2027*
Relevant coursework: Data Structures, OOP, DBMS, Operating Systems, Computer Networks
